

Sports Master (Grass Harrows - Groundcare)

OVERVIEW

The Sport Master is a very strong manual folding spring tined harrow. It is used for removing dead organic matter as well as thatch. Since there are different tine diameter options to choose from, it can groom the surface very efficiently. The tine's angle can also be adjusted based on whether you need a light comb or aggressive harrow for sports pitches.

The Sports Master is perfect for various settings such as combing and aerating fairways, aerating and conditioning sports and rugby pitches as well as conditioning horse gallops and public parks. It has a sturdy yet light construction and a 5m working width. This allows compact tractors to cover expansive areas very efficiently and quickly.

FEATURES

- 2 Rows Hardened Steel Spring Tines

- Adjustable Tine Aggression
- Height Adjustable Depth Wheels

- Cat 1 & 2 (3 Point Linkage)
- Parking Stands
