INSTRUCTIONS FOR FITTING TO LOADER

Mount the back frame centrally to the Loader using the correct mounting holes, pins and sleeves as required with the Universal Brackets (if purchased). The combination of holes on the brackets are designed to cater for the majority of 'Pin-Fix' type loaders.

After mounting to the loader, test for full crowd and tip, ensuring that the hydraulic hoses are not trapped or stretched.

WARNINGS

- *Allow only qualified persons to operate the loader.*
- *Never allow anyone on the loader and/or the attachment when in operation.*
- *Never operate the tractor at reduced speed, especially when making turns.*
- *In transit keep the loader in the lowest position.*
- *Exercise extreme caution on inclines, irregular or uneven ground.*
- *Avoid lowering a heavy load and stopping suddenly.*
- *Do not walk or work under raised load or attachment.*
- *Never leave the loader or attachment in the raised position unattended.*
- *Beware of overhead electricity cables.*
- *Check the tightness of all bolts periodically. Grease moving parts regularly.*
- *Do not leave the ram extended when not in use as this can cause damage to the rods.*
- *Do not use the frame as a crane jib.*
- *NOTE: Extra supports not supplied by Brown's may be required when welding Quick Detach Brackets to the rear frame. Also make sure both box sections are tied together using heavy plate.*

WORKING PRESSURE NOT TO EXCEED 200 BAR
