

Fan Jet Pro (Seed Broadcaster)

OVERVIEW

The original, and still the most popular model in the Fan Jet range. The Pro is the classic slug pelleter for use with ATVs, UTVs, tractors and self-propelled sprayers, in fact, any vehicle with a 12 volt power source.

However, the Fan Jet Pro is also equally suited to broadcasting small seeds and other granular products. Spreading up to 24m (product dependent), it is simple to set up and can use an adjustable disc speed to change spread width. A variety of options enhance the performance of this versatile machine.

FEATURES

- Spread width up to 24m
- Fixed speed application rate
- Easy, quick, stepless adjustment of bias left or right
- Easy emptying of hopper
- Adjustable deflectors to limit spread width
- Optional disc speed adjustment to limit spread
- Mostly used on sprayers or quad bikes
- 3500 rpm disc motor
- Stainless steel shut off mechanism
- Stainless steel twin-vane spinning disc
- Manual stepless adjustment of application rate
- 12v 20A Power requirement
- In cab electric controls. Instant feed shut off
- 5m fused power and 6m connector cable included
- Robust construction with high-quality motors
- Standard Agitator included. Grass optional
- 65 or 130 litre plastic hopper
- Optional grass seed deflector

Options Available

Vario Control Console. A disc speed control to reduce the spreading width, for example to match the implement width, or use to broadcast small seeds with minimum damage (rape, turnips, etc), adjust mechanical width deflectors and 'dial down' the disc speed as required.

Seed Deflector Easily attached all steel deflector gives a more accurate and controlled placement of seed when sowing a cover crop with a cultivator, or establishing grass borders.(supplied with grass agitator) Adjustable width and depth of spread, especially recommended for use with the Vario console for the ultimate in seeding control. (Included as std Fan Jet Pro 130).

Calibration Chute A calibration aid, the all steel chute is easily attached and safely collects and deflects the product being spread into a user provided bag for weighing during calibration checks.
