

Turbo Jet 8 (Seed Broadcaster)

OVERVIEW

The Turbo Jet is a versatile and accurate pneumatic applicator and seeder and will deliver product up to 10m working width. The Turbo Jet 8 has eight outlets and the Turbo Jet 10 has ten outlets.

Commonly used for applying clover seed, full-rate grass reseeds, Avadex, OSR and cover crops, the Turbo Jet can be calibrated to apply precise rates across a wide range of products from 1kg/ha to more than 100kg/ha (dependent on product, working width and forward speed). It can be fitted to a wide variety of machines, from grass harrows to cultivators and rolls, as well as being employed as an additional applicator on a grain drill.

Combining the functionality of other machines with one or multiple Turbo Jets creates a one pass machine, thereby reducing workload and thus saving time and money.

FEATURES

- Complete with Jackal or i-CON controls
- 5m fused power lead and 6m connector cable
- Twin fans for optimum airflow
- Electrically powered hopper agitator to prevent grass seed bridging
- Waterproof, large capacity 240 litre semi translucent hopper
